

CONTENTS

<i>Preface</i>	ix
<i>Acknowledgments</i>	x
<i>Klaus Roth at 80</i>	xi
Numbers with a large prime factor II <i>by Roger Baker and Glyn Harman</i>	1
Character sums with Beatty sequences on Burgess-type intervals <i>by William D. Banks and Igor E. Shparlinski</i>	15
The Hales-Jewett number is exponential: game-theoretic consequences <i>by József Beck, Wesley Pegden and Sujith Vijay</i>	22
Classical metric diophantine approximation revisited <i>by Victor Beresnevich, Vasily Bernik, Maurice Dodson and Sanju Velani</i>	38
The sum-product phenomenon and some of its applications <i>by J. Bourgain</i>	62
Integral points on cubic hypersurfaces <i>by T.D. Browning and D.R. Heath-Brown</i>	75
Binary additive problems and the circle method, multiplicative sequences and convergent sieves <i>by Jörg Brüdern</i>	91
On the convergents to algebraic numbers <i>by Yann Bugeaud</i>	133
Complexity bounds via Roth's method of orthogonal functions <i>by Bernard Chazelle</i>	144
Some of Roth's ideas in discrepancy theory <i>by William Chen and Giancarlo Travaglino</i>	150
Congruences and ideals <i>by Harold G. Diamond and H. Halberstam</i>	164
Elementary geometry of Hilbert spaces applied to abelian groups <i>by P.D.T.A. Elliott</i>	170
New bounds for Szemerédi's theorem II: a new bound for $r_4(N)$ <i>by Ben Green and Terence Tao</i>	180
One-sided discrepancy of linear hyperplanes in finite vector spaces <i>by Nils Hebbinghaus, Tomasz Schoen and Anand Srivastav</i>	205

How small must ill-distributed sets be? <i>by H.A. Helfgott and A. Venkatesh</i>	224
On the power-free values of polynomials in two variables <i>by C. Hooley</i>	235
On a question of Browning and Heath-Brown <i>by Nicholas M. Katz</i>	267
Good distribution of values of sparse polynomials modulo a prime <i>by Sergei Konyagin</i>	289
Diophantine approximation and continued fractions in power series fields <i>by A. Lasjaunias</i>	297
On transfer inequalities in diophantine approximation <i>by Michel Laurent</i>	306
On exponential sums with multiplicative coefficients <i>by Helmut Maier</i>	315
Multiplicative dependence of values of algebraic functions <i>by David Masser</i>	324
Linear forms in logarithms, and simultaneous diophantine approximation <i>by Bernard de Mathan</i>	334
The Caccetta-Hägkvist conjecture and additive number theory <i>by Melvyn B. Nathanson</i>	347
L_2 discrepancy and multivariate integration <i>by Erich Novak and Henryk Woźniakowski</i>	359
Irregularities of sequences relative to long arithmetic progressions <i>by A. Sárközy and C.L. Stewart</i>	389
The number of solutions of a linear homogeneous congruence II <i>by A. Schinzel, with an appendix by Jerzy Kaczorowski</i>	402
The diophantine equation $\alpha_1^{x_1} \dots \alpha_n^{x_n} = f(x_1, \dots, x_n)$ <i>by Wolfgang M. Schmidt</i>	414
Approximation exponents for function fields <i>by Dinesh S. Thakur</i>	421
On generating functions in additive number theory I <i>by R.C. Vaughan</i>	436
Words and transcendence <i>by Michel Waldschmidt</i>	449
Roth's theorem, integral points and certain ramified covers of \mathbb{P}_1 <i>by Umberto Zannier</i>	471
